## Higher education

### **Secure your campus by integrating enterprise-level technology to meet the emerging threats to your organization**

Campuses have their own unique set of challenges and threats—and they never stop changing. Today's new reality requires a broad range of integrated solutions and an ever-vigilant approach. The ADT Commercial team can put our experience to work to help you stay one step ahead with a system that is totally seamless. Whether you need to upgrade a legacy system, rethink your mass notification, add cutting-edge access control, hand off the headaches of maintenance or any number of other needs, one call can take care of it all.

### **A comprehensive security and fire plan**

What do you need? What are you missing? What new threats are on the horizon? The right security plan starts with understanding your needs and then applying advanced technology to provide solutions. Before we begin any project, our team will sit down with you to

review your buildings, dorms and entire campus. We'll address your concerns and review current systems to gain an understanding of your needs. Then we'll work with you to create an integrated solution that delivers a comprehensive safety and security plan.

### **A highly skilled and experienced team**

One call to ADT Commercial will connect you with a team that can handle all of your life safety, fire and security needs. From customization assistance and installation to maintenance and monitoring, our experienced team is with you every step of the way with hands-on service and local knowledge. We partner with our clients and make it our business to understand the unique workings of yours. We're big enough to handle the largest challenges with the very latest in technology, but local so we can be right there when you need us.

# Higher education solutions

## MASS NOTIFICATION

Our mass notification systems allow for immediate notification to large groups that may be impacted by an event. Whether an everyday event such as traffic, weather or campus activity—or a security breach or emergency, our solutions provide communication across indoor, outdoor and electronic environments, including text.

## ACCESS CONTROL

Our specialized teams deliver a full range of access control solutions that include access and egress, door control, badge systems and biometrics including DNA, fingerprints, retinas and irises, and even voice patterns. You can manage the system remotely via our industry-leading cloud solutions and configure alerts in the technology of your choice (on-site alarm, telephone, cell, text, email).

## VIDEO SURVEILLANCE

Our video systems include DVR and NVR (analog and IP) and networked IP components that use network standards and networked attached storage devices for increased flexibility. Using network architecture, remote viewing is as simple as logging on.

## FIRE ALARM

Backed by a 50-year heritage from some of the most well-respected names in the fire industry, we can provide everything your campus needs, from a zone panel to a fully networked system that includes fire, carbon monoxide, smoke and heat detection. We also offer specialty systems and a knowledgeable team for unique needs such as a rare books library or a laboratory facility.

## FIRE SPRINKLER (in select markets)

We assist with design and can install your fire sprinkler systems to not only meet local and national code, but also to help ensure that your system will perform when it is needed most. Our services also include testing, inspecting, detailed reporting and emergency response.

## INTRUSION DETECTION

We use the right technology for your school, not some out-of-the-box solution. This helps to ensure that only real alarms are detected and transmitted to responding agencies. Video alarm verification helps reduce false alarm fees, unnecessary police dispatches, and provides more information on actual crimes in progress.

## MONITORING

We have dedicated commercial monitoring centers—redundant and listed by Underwriters Laboratories. Powered by industry-leading technology and solutions, 24/7 monitoring can add valuable coverage to your system.

## PANIC BUTTON

On-site panic buttons can immediately be triggered during an event to alert first responders. In emergency situations, response time is everything.

## REMOTE GUARD TOURS

We help you to decide whether to reduce manned guard expenses with remote video tours of your premises. We can perform these tours at times and intervals you select, looking for specific activity you deem important. Two-way audio capabilities also allow for immediate intervention and can help stop an event in progress.

## Let's start a conversation.

ADT Commercial has extensive experience working as partners with educational facilities at hundreds of locations across the country. We make it easy to switch providers, and our onboarding process is predictable, dependable and painless.
