

Oil and Gas Solutions

Your One Ideal Partner for risk-based and compliance-driven security, fire and life safety.

ADT[®] Commercial

▼

When it comes to effectively addressing the unique and complex security risks, concerns and regulations you face in the oil and gas industry, you need more than a provider—you need a partner.

Whether you're operating remote, unmanned production facilities, pipelines and terminals, or large refineries and chemical plants, you can rely on ADT Commercial for service excellence, delivered reliably and effectively throughout the country by our local teams. We understand the regulations you face—across the industry and individual to your sites—and always prioritize worker safety and compliance for all on-site work.

Specialized oil and gas solutions

- ▶ Integrated fire, heat and gas detection systems
- ▶ Mass notification and communication
- ▶ Emergency response planning
- ▶ Emergency mustering
- ▶ Managed network services/protection
- ▶ Perimeter and physical security
- ▶ Special hazard material monitoring
- ▶ Managed key control/smart locks with auditing and reporting
- ▶ Video surveillance solutions for Class I, Division 2 areas

▼ Operational disruption isn't an option

Ensuring reliable energy delivery to the market

The critical resources you produce and energy you provide are essential to your customers, our economy and your bottom line.

- ▶ Intelligent video surveillance (including solutions for hazardous areas), analytics and 24/7/365 UL Listed monitoring to help identify issues before they impact your operations
- ▶ Remote managed services can proactively identify and notify you of malfunctioning or offline equipment to prevent disruptions
- ▶ A defense-in-depth approach to protect network operations infrastructure mitigate risks to IT systems, minimize downtime and enhance security controls

Finding the right solution to streamline operations

Your security systems need to align with your priorities and create efficiencies for your organization.

- ▶ Integrated systems can help create efficiencies and help you focus on your business success
- ▶ Scalable, product-agnostic solutions mean your security and emergency response programs can advance to meet your needs, at your pace
- ▶ From targeted site upgrades to large-scale enhancements, all offerings are customized to address your specific operational and security concerns

ADT Commercial helps you maintain industry regulatory compliance

Your One Ideal Partner with industry regulations:

- ▶ Chemical Facilities Anti-Terrorism Standards (CFATS)
- ▶ Maritime Transportation Safety Act (MTSA)
- ▶ Security Vulnerability Assessments (SVA)
- ▶ OSHA requirements
- ▶ Site Security Plans (SSP)
- ▶ Transportation Working Identification Credential (TWIC)
- ▶ Risk-Based Performance Standards (RBPS) compliance

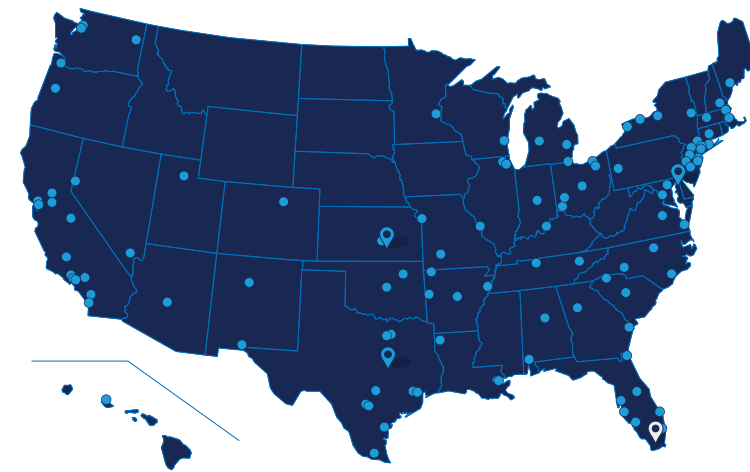

Local offices backed by experts at our Network Operations Center

To protect and support your critical network operations infrastructure, engineers at our dedicated Network Operations Center are highly qualified.

- ▶ Cisco Premier Partner (CPP) Certified
- ▶ Cisco Cloud and Managed Services Provider (CMSP) Certified

Protection for remote, unmanned facilities

As part of the comprehensive oil and gas process, you have remote sites that need protection. When responsible for securing unmanned facilities spread over wide geographic areas, it can be a challenge to implement a solution due to limited infrastructure and lack of visibility.

- 📍 Corporate Headquarters
- 📍 Monitoring and Operations Centers
- Commercial Locations

When you partner with ADT Commercial, you can benefit from our expansive service footprint of over 150 local offices to support upstream, midstream and downstream facilities anywhere in the country—no matter how remote.

- ▶ Intrusion detection systems alert to break-ins, site tampering and trespassing
- ▶ Solar and battery-powered, cellular-based solutions provide remote video surveillance options
- ▶ Cloud-based access control system with managed key control limits entry to only authorized personnel
- ▶ Robust fire and fire suppression capabilities can minimize site damage and notify first responders as needed
- ▶ eSuiteSM offers 24/7 actionable insight into remote or unmanned sites to make critical business and operational decisions from a distance

▼ Responding to complex security threats

You face security threats that are wide-ranging and unique to the industry, including terrorism, active shooters, workplace violence, criminal activity, explosions and other fire hazards.

We understand that security solutions must actively mitigate site-specific security threats. Intrusion detection and integrated/smart access control with auditing and reporting features ensure only authorized personnel are allowed on-site.

- ▶ You can rely on us to help you to quickly identify issues and resolve them before they impact operations
- ▶ Enhanced physical security and hardened perimeter protection keep intruders out and safeguard critical infrastructure
- ▶ Benefit from our teams' experience in special hazards monitoring solutions and services, compliance standards and comprehensive understanding of the security challenges you face

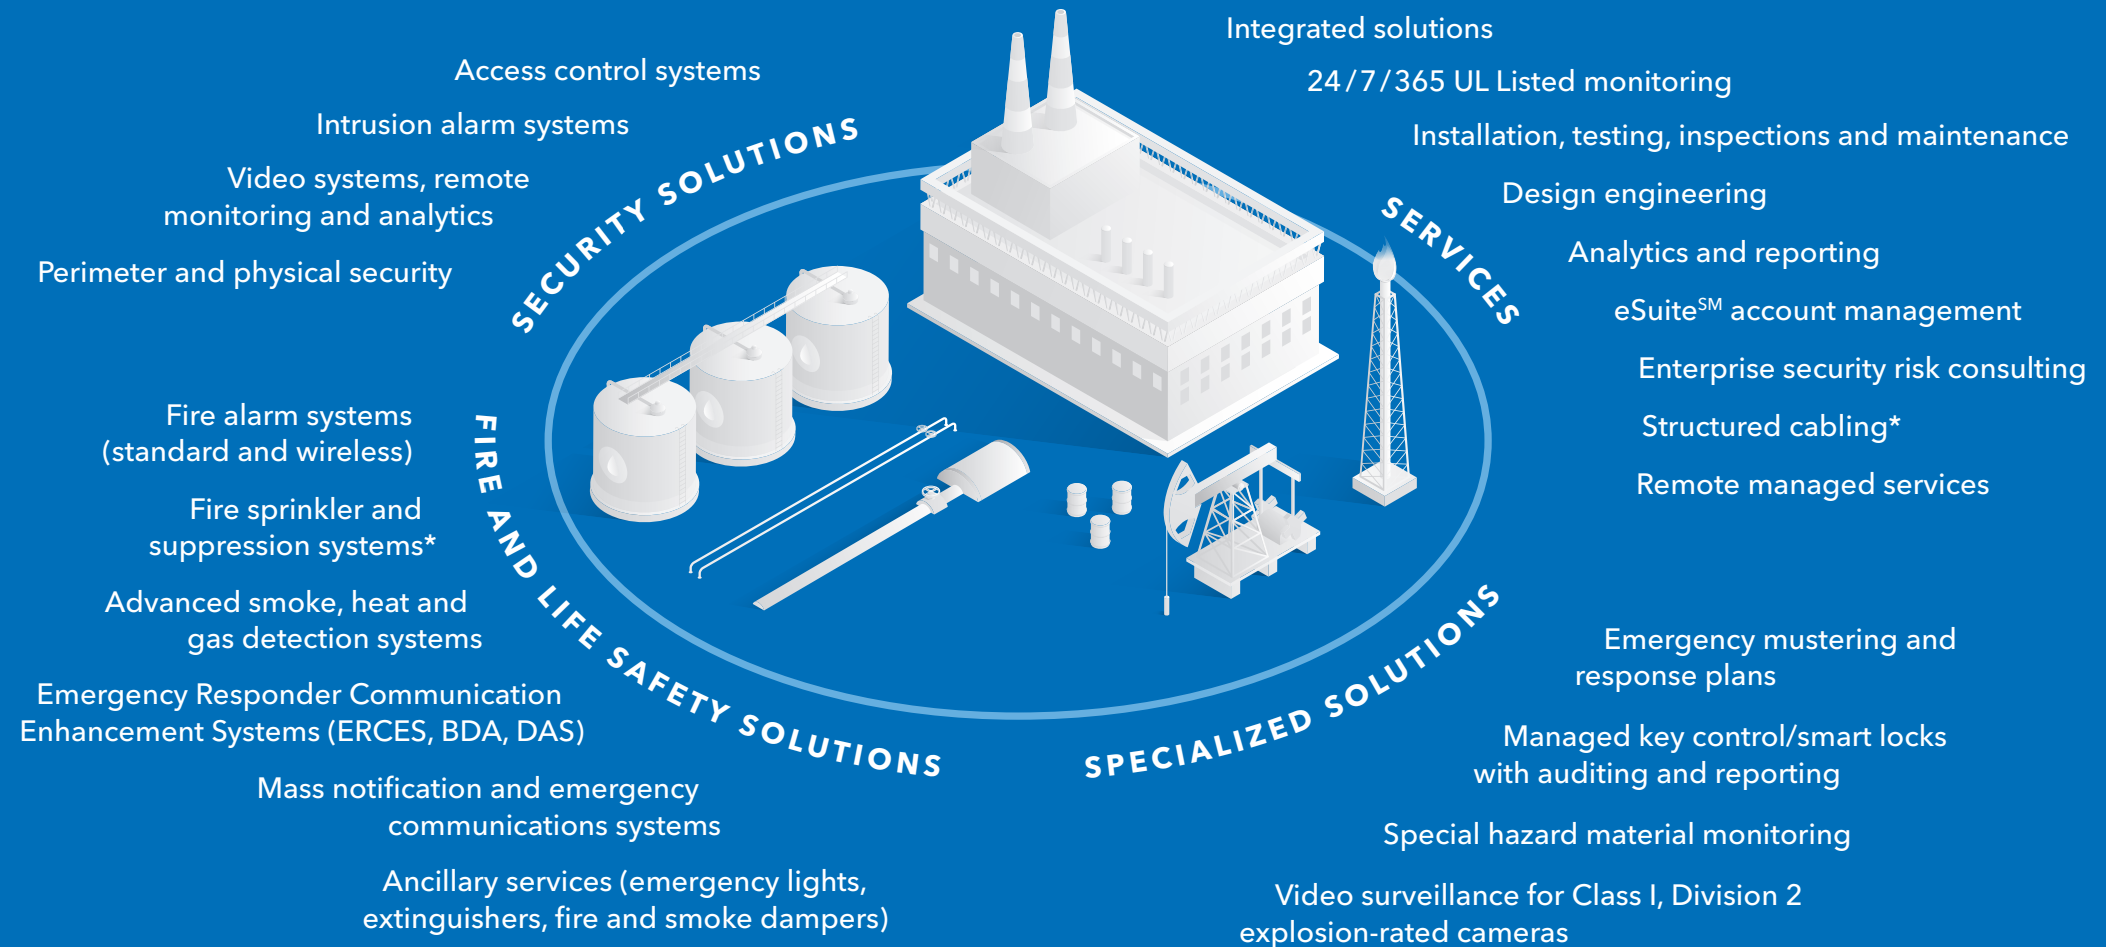

Real-time activity reporting

eSuiteSM account management enables you to identify and respond in real time to critical business operation decisions, including remote or unmanned sites.

Your One Ideal Partner

Integrated solutions that help you reduce costs, mitigate risks and protect your people, property and assets.
