

ADT Commercial

Total pharmacy protection

One call takes care of it all

Our experienced professionals can help plan, install and monitor a customized security and fire system that's just right for your business. We will work with your team to help ensure that it is tested, maintained and serviced so it runs at peak performance. We bring decades of hands-on local and national experience to the table and are committed to helping protect your employees, customers, assets and property from risk.

The power of partnership

ADT Commercial offers the strength of national resources along with the attention of local management. We'll work with your pharmacy to help create a safe environment, guard against the loss of controlled substances, and help prevent theft.

As your partner, we begin by listening to your challenges and understanding your legacy system.

- Some companies manufacture their own security, fire and life safety equipment—we do not.
- By not being locked into a narrow selection of products, we can develop a custom solution that incorporates the benefits of many different manufacturers.

Our expert install teams can get your security and fire system up and running, integrate it with your current system, and even train your employees on its use.

ADT Commercial security, fire and life safety systems will take the shape of your pharmacy's specific needs

We can handle it all—from upgrading a legacy system to adding IP cameras, swapping out a safe or planning a new system from scratch. We can work with you at any point in the process, from just starting out to halfway through a build, or to simply updating your current system.

OUR OFFERINGS INCLUDE:

- Intrusion and fire systems
- Access control systems
- IP-based video surveillance systems
- Holdup/duress buttons
- Pneumatic drive-up system with 2-way audio/video
- Pharmacy drawer/window
- Bullet resistant glass/doors
- Laboratory and under-counter cabinets
- Under-counter deal drawer

The ADT Commercial team isn't just available to you—we're your neighbors

Our local service technicians will respond to your needs with a unique understanding of your pharmacy.

Service offerings include 24/7 central station monitoring, regular preventive maintenance, testing and inspection.

We stay on top of changing regulations so we can help take joint commission requirements off your worry list.

Let's start a conversation.

We work with some of the largest hospitals and pharmacies in the country and are ready to tailor, install and program security, fire and life safety systems to meet your needs. We make it easy to switch providers, and our onboarding process is predictable, dependable and painless.
